Hear What a Few Coaches are Saying about Sportstec...

"Our staff at Texas Tech University has never been involved with a better video system than that of Sportstec. We are in our second year of use with their system and we could not be any happier. It is easy to use and at the same time very effective. The support and moreover, the availability of support we have received when needed has been great. Overall, Sportstec has been a tremendous tool for Texas Tech and there is little doubt in my mind that it will become an equally positive asset to your program."

Bob Knight
Texas Tech University Men's Basketball

"One of the first things I did when I arrived at LSU two years ago was to contact Sportstec, ask them to come to Baton Rouge as soon as they could to set up a new digital video system. Sportstec came in the next week, sat down with us, evaluated our situation, and implemented a solution for us that fit all our needs and was within our budget. Sportstec has contributed greatly to our success over the past couple seasons. For basketball, these guys are the best in the business."

John Treloar
LSU Men's Basketball

"Based on my experience and research, I definitely believe that Sportstec is the best video editing software for basketball on the market. I know that it has been great for us! The software and its many capabilities have made a big difference for us. But the people and the service they provide has too."

Mike Schrage
Duke University Men's Basketball

"The SportsCode Elite site license has allowed a majority of our athletic teams at the University of Virginia to take advantage of the latest in digital video editing technology. The site license also enables multiple coaches from each sport to utilize the software. Instead of one coach breaking down a game or practice, several coaches can focus on their particular area. SportsCode's user-friendly approach enables coaches of varying computer skill levels to be introduced to the software and then advance in complexity over time. The UVa athletics department views Sportstec as a valuable partner."

Todd Goodale, Director of Video Services
University of Virginia Athletics

Hear What a Few Coaches are Saying about Sportstec...

"I could talk about the all the 'bells and whistles' and ease of use of Sportstec programs but the best thing I can say is it helps us win games!!!! That is the bottom line. College basketball is very competitive and we are looking for any edge possible. I really don't care that it saved us money (although our assistant AD does!). I care that it made us better. However, the claim that it saves time just isn't true. It makes us a ton more effective and able to do so much more in the same amount of time. Heck, we might even spend more time on video because it is so productive. It is about efficiency not going home early. Sportstec simply helps us be as good as we can be.... and win games!!!!"

Eric Reveno

Stanford University Men's Basketball

"Sportstec is extremely convenient and user friendly, which will save you time that you can spend recruiting and coaching your team."

Paul Hewitt

Georgia Tech Men's Basketball

"This is our fifth year working with Sportstec and I am still very excited about the system. I recommend it to anybody who will listen! Sportstec is the most comprehensive scouting system that I have seen and I would challenge anybody that thinks differently. The most impressive aspect of the system is its flexibility. We can make a change in the system in the middle of a scout. If something comes up unexpectedly, the system adapts immediately. The price is right and the service is the best in the business. I am a basketball coach, but the system is so user-friendly that I guarantee you it will work for any sport in the world."

Willis Wilson

Rice University Men's Basketball

"GameBreaker has taken our game preparation and post game analysis to a new level. Since we can do more things in less time, it makes our game preparation more complete. Also with the aid of an assistant, we have instant video broken into usable segments immediately following a game. GameBreaker is the future and I would not go back to editing tape the way we used to. My time is too valuable."

Kip Staggs

Martinsville High School, Indiana Men's Basketball

Hear What a Few Coaches are Saying about Sportstec...

"In my years editing game film, I've used three different well-known systems. Sportstec is easily the best because of the thought that has gone into making it so functional. It's easy to use, and more importantly, easy to adapt."

Justin Tanisawa

Cal Berkeley Men's Basketball

"Sportstec's software was a big reason for our team's success. I was always a coach who believed watching and breaking down film was so important, and Sportstec made it very easy and simple for me. Their program gave me the opportunity to have quality film time with my players and coaches. The biggest plus was that Sportstec was fantastic in helping me with any questions, anytime I needed help. Sportstec was a definite plus for any program looking to be one step ahead of their competition."

Vance Walberg

Fresno City College Men's Basketball

"Having had the opportunity to observe and use other video editing systems, I don't at all mind saying that Sportstec is by far the best, and here's why:

1. *It is very simple to learn how to use. We upgraded this year so that every coach had his own laptop equipped with the SportsCode software. None of the coaches had any experience with SportsCode in the past, but by the first game all coaches were able to do their own edits for our players as well as their own scouting reports. The transition from the days of a VCR and a legal pad was seamless.*

2. *The customer support is fantastic. If any issues arise, you will be able to immediately reach a basketball expert who will walk you through and solve any difficulties. These guys will go out of their way to help you, 24/7.*

3. *The flexibility of the system is just awesome. You can edit multiple things simultaneously. For instance, if your team is playing half court defense, you might want to isolate a variety of defensive breakdowns within that particular possession. With SportsCode, your coaching staff decides what is most important, and you design the system around your needs. The possibilities are limitless.*

4. *LIVE BREAKDOWN--The user friendliness and flexibility allow your program to break the game down live as it occurs. So, by the time the coaches are finished with post game activities, a copy of the game and all breakdowns are on their computers to take home with them.*

In short, our experience using SportsCode has been nothing but positive, and we would recommend it to anybody without hesitation."

Pete Schwethelm

Georgia Tech Men's Basketball

Hear What a Few Coaches are Saying about Sportstec...

"The Sportstec GameBreaker product has been a valuable addition to our basketball program. It allows us to breakdown game film quickly and easily to review with our players and coaches. The quality of the film is tremendous when capturing the game directly onto the computer via the GameBreaker software. The software has been a great advantage for us versus our opponents with regard to game preparation, game review and scouting. The technical support and training for the product has been outstanding and I have strongly recommended the software to many of my coaching colleagues. Sportstec was truly one of the best investments our program has ever made."

Coach Rich Forslund

Archbishop Riordan High School Men's Basketball, San Francisco, CA

"The night before leaving for the Hawaii Surf-n-Slam at approximately 2:00am, we were finishing our last breakdown on our opponents for the second round. We entered something inaccurately and cross-referenced it wrong. Instead of panicking, we called Sportstec and they immediately solved our problem with a click and a drag of a few icons. How much more is needed to say about the easiest, most transportable, inexpensive editing equipment on the market? When you talk about portability, you assume just the carrying part. We are talking about the ability to use the equipment on the bus, in the air, and in the hotel lobby to get work done that will make your team better and give you the edge in your next game. We not only endorse the product 100%, but we look forward to learning more about the total uses and apply them to our needs making us even more efficient."

Paul Mills

Baylor University Men's Basketball

"I was able to code our games right after they ended to break down the plays I wanted to use as teaching points for my team. Sportstec's software is very easy to use and a great instructional tool."

Rob Jeter, Head Coach

Wisconsin-Milwaukee Men's Basketball

"Gamebreaker is probably one of the most new and technological advancements in college basketball today. This software is user friendly, and helps us in many aspects such as player development, scouting reports, and film breakdown."

Clint Burges

Lamar University Men's Basketball

Hear What a Few Coaches are Saying about Sportstec...

"Our program has benefited from Sportstec's system in many ways. To me, the greatest benefit has to be our ability to code our games live. To break our games down during the game and have them ready for our staff as soon as we walk in the office is invaluable. On the road, it allows our staff to have access to the game tape as soon as we leave the locker room. You can't put a price tag on that type of convenience. In this day and age when everyone wants everything now, at least Sportstec can deliver!"

Scott Thompson
University of South Florida Men's Basketball

"Sportstec and their products are a first class operation. Their cutting edge technology helped get our program "over the hump," as we enjoyed our first appearance in the Big Dance. Their product is a difference maker. It has made our staff better, our players better, and our program better. The service and customer appeal is second to none -- it fits with their commitment to excellence. Winning is contagious, and it's no coincidence that our success this season correlated with becoming a Sportstec customer. They are the best!!"

Todd Howard
IUPUI Basketball Men's Basketball

"I am most impressed with how user friendly the software is and how easy the system has been to use on the road. SportsCode has allowed us to maximize our time with opponent preparation, team performance, and individual post-game evaluations. The amount of information you can retrieve about your opponents or your own team is endless."

Mark Amaral
UC Santa Barbara Men's Basketball

"Sportstec has allowed us to become very efficient at home or on the road. The program has allowed our staff and players to instantly evaluate performances in the office, on the bus, or at the airport. The combination of high-quality and portable digital video has become irreplaceable to our program."

Matt Bowen
Valparaiso University Men's Basketball

Hear What a Few Coaches are Saying about Sportstec...

"I am very pleased with the system we have from Sportstec. It is a user-friendly system that has allowed our entire staff the opportunity to use the editing system not only for scouting, but also for teaching purposes with our players. Player development has been greatly enhanced with the Sportstec system. Sportstec customer service has been very much appreciated by our staff. Whenever we have had questions about the system or have ordered software/equipment during the season, they have provided fast service and the follow up phone call to confirm our satisfaction with the Sportstec product. I would recommend Sportstec to schools looking to upgrade their editing equipment as an efficient, affordable, and easy to use system."

Steve Lynch

Missouri State/Ball State Men's Basketball

"The Sportstec GameBreaker program brought tremendous video editing capabilities to all of us who don't have unlimited resources. It is easy to learn, inexpensive, and every time I use it I am more excited about its applications. The clips I show the team are cleaner, take considerably less time to put together, and are more versatile than the old VCR-to-VCR method. As much as I love using it, I have barely touched the limits of its abilities. I highly recommend Sportstec systems."

Jim Shaw

Rose-Hulman Institute of Technology Men's Basketball

"If you are looking to upgrade your program, Sportstec is the answer. Our experience with Sportstec has been first class. The software flexibility has adapted to each coaches personality and style. It allows you so many different presentation options. However, the most important facet of the program is how user-friendly it is. Each of our coaches was able to learn and work the program in a very short time, it almost teaches itself. The customer service staff at Sportstec will work and help until any problem is solved. They feel like they are part of your staff and team. They are always available and accessible. Finally, in our business, where time is so precious, Sportstec has allowed us as a staff to maximize our time working smart and efficiently."

Mark Slessinger

Northwestern State University Men's Basketball

2006 NABC Final Four Convention

Hear What a Few Coaches are Saying about Sportstec...

"I was apprehensive at first about this program given the initial investment, but after purchasing it and putting it to use this past season, I can unequivocally say it was well worth the price.

While we have always prided ourselves in our program on preparation, the Sportstec system made that preparation we had done in the past multiply exponentially. Our players enjoyed the quick and to-the-point sessions we were able to have with them and used it on an individual as well as team basis. The ability to prepare for opponents and correct on mistakes and build on positives with our own team put our high school program on par with what major colleges around the country are doing.

Finally, the ability to put on a first-class highlight film that rivaled productions done by television and commercial producers made for a nice capper and reward for our parents and players alike."

Shane Matzen

Marquette High School, St. Louis, MO Men's Basketball

"I have experimented with and used several different digital video editing systems and without any reservation, Sportstec is the best basketball product on the market. This year was the first year that Texas Tech used Sportstec and across the board, from Coach Knight to the assistants, down to the players, we could not have been more impressed with their product. Nobody watches more film and demands more breakdown of film than Coach Knight and Sportstec enables me to do everything necessary in an efficient and effective manner. Moreover, the major difference between Sportstec and all other products is the quality of the video. In addition, a few other notable aspects of Sportstec that set their product apart from others are how extremely easy it is to use, a time-saver, portability, and how dependable and reliable it has been. Lastly, the support we have received has been absolutely great. In all, everyone here at Texas Tech enjoys working with Sportstec and would highly recommend their products to whoever is seeking a digital video editing system."

Jason Imes

Texas Tech University Men's Basketball

"The Sportstec program has improved our efficiency tremendously. As a high school coach who teaches 5 classes a day, the ability to break down video quickly and in such a neat tidy package has helped us win games, period. The tremendous quality also helps us in individual instruction as we can break down a player's movements frame by frame and show him his strengths and weaknesses. I would recommend this package to anyone, anywhere, anytime.

Doug Mitchell

North Central HS, IN Men's Basketball
